About

I am a product designer focused on turning complex products into clear, high-quality digital experiences. I work across product strategy, UX, visual design, prototyping and production, using AI-native tools to move quickly from idea to working product.

Work Experience

Product Design Lead at Kutuby — June 2025 – Present

Arabic Alphabets, Quranic Words and Games v1.0

- Defined the product strategy and established a scalable design system for interactive learning and educational activities like arabic lessons whilst serving 50,000 parents and children
- Designed engaging Arabic learning experiences covering alphabet recognition, Quranic vocabulary, and interactive gameplay with delightful micro-interactions and child-friendly interfaces.
- Designed and led the Kutuby AI Assistant, overseeing character design, animation, and conversational interaction design.

Senior Product Designer at Cuvris AI — Dec 2024 – March 2025

Post Acute Care Coordination Automation

- Led the design efforts for an AI-powered healthcare revenue optimization platform at Cuvris, focusing on improving user experience, automating eligibility verification, and streamlining referral management workflows to enhance operational efficiency and patient satisfaction.
- Designed intuitive dashboards and automation tools that enhanced care team collaboration and decision-making.
- Conducted user research with healthcare professionals to refine product usability and ensure seamless integration into existing workflows.

Consultant UI/UX Designer at eHealth Africa — Jun 2023 – Nov 2024

Blood and Vaccination Platforms (Vaxtrac and Biskit App)

- Worked as a consultant UX designer and successfully iterated on user-centric interfaces, ensuring a seamless user experience for healthcare providers and designing vaccination platforms for accessing over 4 million life-saving vaccines in Nigeria and Sierra Leone
- Played a key role in transforming complex vaccine datasets into visual and interactive prototypes, aiding in quicker decision-making processes for healthcare professionals and the vaccine delivery team
- Worked closely with software developers, to ensure designs were translated into functional user interfaces, and ensuring that the final product aligned with the design specifications and eHealth Africa's mission.

eHealth Africa Design System

- Designed the eHealth Africa multi-design system by setting the design principles and governance, component libraries, streamlining the design process and ensuring consistency across all eHealth Africa digital platforms, which resulted in 60% reduction in the time required to develop and test new health care platforms.

Founding Product Designer at PneumaCare **Apr 2022 – Feb 2024**

Frontdesk by PneumaCare (Patient Engagement Platform)

- Led redesigning the healthcare practice management platform, optimizing provider and patient experiences. This endeavor facilitated over a 60% increase in processed bookings, served a substantial base of 50,000 patients, garnered outstanding ratings, and successfully onboarded 370+ healthcare providers.

North App (Digital First Primary Care App) Project Link

- I designed the brand identity, establishing business strategy and design direction end to end, and crafting the user experience for the mobile application. This effort led to the successful service of over 15,000 patients, achieving an impressive consultation rating of 4.7 and a 386% surge in consultations during the second half of 2023.
- Led the design of an innovative AI-powered chat-based symptom checker, leveraging the capabilities of GPT-based technology to deliver reliable and accurate answers to 3,554 health-related questions.

Visual Designer at Yoda Box **Mar 2020 - Dec 2021**

Interactive learning for kids (TV, Android & IOS, Tablet and Desktop)

- Designed and utilised Yoda Box brand guidelines to create compelling visuals for marketing and product release.
- Designed user interfaces for cross devices including mobile, tablet, TV, and web applications catering to primary school children needs.

Yoda Box Design Thinking Bootcamp

- Collaborated with educators and school owners to facilitate in-school workshops and design books promoting design thinking for kids in primary schools
- Organized outreach programs aimed at fostering children's interest in technology and design.

Projects

Rednoxx Healthcare Design System **June 2026**

- Designed and code the Rednoxx healthcare platform for enrolments, payments, insurance, consultations, prescriptions, labs, surgery, and reporting. The design system with has 10 foundations, 36 components, and 30 healthcare blocks, validated across a 50 screen product demo.

Volunteering

Community Lead at Friends of Figma Kano **2021-Present**

- Organized and facilitated in-person and virtual events to nurture emerging designers, raise awareness, and educate audiences on design principles and related topics.
- Contributed to the growth and impact of the design community to 345 active Members

Education

B. Eng Civil Engineering at Bayero University Kano **2015-2020**

Certifications

Membership Certificate from Interaction Design Foundation **2023**
